Welcome!

Thomas, Theo en Corné Huntink

your manufacturer and supplier of corporate green gifts

Corthogreen is a specialist in developing and producing seed-related products and sustainable business gifts. In 1888 is the company founded and with proud they belong to the oldest and also the largest producers of seed-related products. The main goal of this innovative company is to inspire their customers with new technologies and creative designs.

All our orders are produced at our family business, using the most modern machines in accordance with international standards. We use Laudenberg filling equipment, CPU seedpaper production machines, seedtapes machines and a range of Illig blister packaging machines.

All our products, customized seedbags, seedpaper, seedtapes, give-aways, mini greenhouses, greengift displays and zinc mini buckets are subject to continuous quality monitoring by NAK-tuinbouw, the Dutch seed inspectorate. So quality and reliability remain our first priority!

Take a look at the following pages for your advantage and interest and contact us directly for customized possibilities and further advice! We are proud to present our assortment and a lot of new products.

Team Cortho Green B.V.

Quality is very important for us and therefore we know exactly where our raw materials come from. Mainly, we buy our raw materials in the Netherlands or somewhere in Europe. We make our products only in our own factory in Terborg that is located in the Netherlands. This gives us a constant view of the production process and the quality we deliver. You are always welcome to visit us and see it by yourself.

“Doing what you are good in.” That is important for us. Our customers do what they are good at. Therefore, Corthogreen wants to unburden their customers when it comes to purchasing seed-related articles and sustainable business gifts. We can do the whole process for you: brainstorming, designing, manufacturing, packaging and the distribution

Keep Growing!

I am proud of my team to show you our new catalogue. Full of new products, ideas, creative concepts with sustainable business gifts and seed related products. Times are changing and people change too, that’s why we always develop new ideas and want to help our customers. Global awareness of sustainability is important for our product development, that’s why we developed seedpaper envelopes, organic seed products and zero waste products. Please take a look in the catalogue, see our assortment and Keep Growing!

Theo Huntink

Sustainability and Corporate Social Responsibility (CSR) are important values in the mission of Corthogreen. In addition to the economic value, we also create social value. We do this in the field of making products that will not damage our world where we are living in. The social value is also focussing on our own packaging company ‘Hupackso’ with people who have a distance to the labour market.

What's new

we are constantly developing new products for you

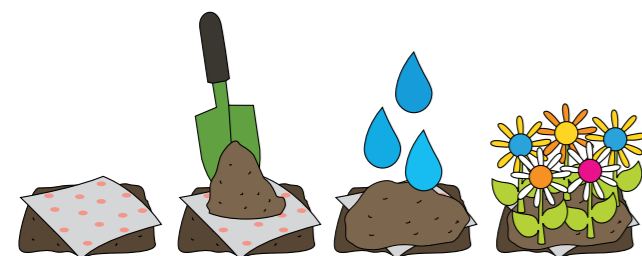

Share ideas

Over the years, Corthogreen has been constantly developing new products. It is all about promotional eco-friendly, environmentally friendly and biodegradable products. Those new products will have endless possibilities to impress your customers. A surprising message have to be given. Our team of product developers and designers have developed some great products and concepts. They are proud and happy to share these new ideas with you.

Seedpaper Envelopes

Corthogreen makes seedpaper already for more than 30 years. There are a lot of product possibilities for this biodegradable paper with seeds inside. The seedpaper is already made in different shapes, with different prints, with different seeds and with a lot of colors. But now Corthogreen can also make the seedpaper envelopes, for the people who want to send a letter without waste. After using the envelope, people will just put the envelop in the ground and the flowers will grow. A great way to show your customers your sustainable awareness.

For more information check page 11.

Green and simple

everybody can do this

Easy Gardening

More and more people are becoming aware of sustainability and have an environmental friendly way of thinking. People like to grow their own flowers, herbs and vegetables. From the other side, people also want to grow their own products in a easy way. Corthogreen wants to make it easy for people to sow their own flowers, herbs and vegetables. For example with our new seedsticks. Put the stick in the garden or pot and the seeds will grow. We also have the total biodegradable sowing pot. When you use this pot for sowing some seeds, you can put the whole pot in the ground when the plant is getting to big. Our seedpaper is also easy to use. Put it in the ground, give it a bit of water and see the flowers growing.

We love nature!

Protecting the nature and planet is important. That is possible with our seedproducts. When people sow seeds for flowers and herbs, bees and butterflies will come to eat from the flowers. We created a lot of products with good seeds for the bees. For example a simple seedbag with bee-friendly seeds is a great ecological business gift, to show your customer that you take care about our nature.

Check all the products on our website or send us an email.

ORGANIC SEEDS

„Consumers are becoming more aware of what they are buying and also take more care to protect their environment. Since the beginning of 2015 we are SKAL certified. This means that we are allowed to trade organic seeds and process them in our products. For this we are under the control of the following authority: Skal, Bio control.“

Skal number: 103975 NL-BIO-01

BIODEGRADABLE PRODUCTS

„The global waste gets bigger and bigger. That is why Corthogreen thinks it is important that their products are as biodegradable as possible. Our seedpaper and seed ribbons are 100% biodegradable. This is also an important aspect when developing new products.“

For example, the development of grow sets with biodegradable pots. We want to reduce the use of plastic so we use as many recyclable packaging materials as possible. All products can be found in the product category ‚zero waste products‘.“

Check all the products on our website or send us an email.

A photograph of a man and a woman in a greenhouse. The woman is wearing a white long-sleeved shirt and a bright green apron. They are both looking at a large terracotta pot filled with various green herbs. The background shows wooden slats of a greenhouse structure.
