Thomas, Theo en Corné Huntink

Welcome!

your manufacturer and supplier of corporate green gifts

Corthogreen is a specialist in developing and producing seed-related products and sustainable business gifts. In 1888 is the company founded and with proud they belong to the oldest and also the largest producers of seed-related products. The main goal of this innovative company is to inspire their customers with new technologies and creative designs.

All our orders are produced at our family business, using the most modern machines in accordance with international standards. We use Laudenberg filling equipment, CPU seedpaper productionmachines, seedtapes machines and a range of other packaging machines.

All our products, customized seed packets, seed paper, seed tapes, give-aways, mini greenhouses, greengift displays and zinc mini buckets are subject to continuous quality monitoring by NAK-tuinbouw, the Dutch seed inspectorate. So quality and reliability remain our first priority!

Take a look at the following pages for your advantage and interest and contact us directly for customized possibilities and further advice! We are proud to present our assortment and a lot of new products.

Team Cortho Green B.V.

Quality is very important for us and therefore we know exactly where our raw materials come from. Mainly, we buy our raw materials in the Netherlands or somewhere in Europe. We make our products only in our factory in Terborg that is located in the Netherlands. This gives us a constant view of the production process and the quality we deliver. You are always welcome to visit us and see it by yourself.

“Doing what you are good in.” That is important for us. Our customers do what they are good at. Therefore, Corthogreen wants to unburden its customers when it comes to purchasing seed-related articles and sustainable business gifts. We can do the whole process for you: brainstorming, designing, manufacturing, packaging and the distribution

Amazing green gifts
for innumerable occasions

Unique developed products

In this catalogue, we would like to present a new product line: **Corthogreen Products**. Careful for you selected and based on the yearly holidays: Growing sets with flowers for spring and easter, tasty herbs to grow in your kitchen, green Christmas gifts and much more. All the experience of the Corthogreen team and best selling product information is put in the development of this range. The range stands for the best product developments, the finest seed quality and the best packaging ideas. All the products are made in The Netherlands and full fill the high Corthogreen standards on corporate social responsibility.

The next generation of growing sets:
CorthoGreen Products

Sustainability and Corporate Social Responsibility (CSR) are important values in the mission of Corthogreen. In addition to the economic value, we also create social value. We do this in the field of making products that will not damage the world where we are living in. The social value is also focussing on our own packaging company ‘Hupackso’ with people who have a distance to the labour market.

What's new

we are constantly developing new products for you

Share ideas

Over the years, Corthogreen has been constantly developing new products. It is all about promotional eco-friendly, environmentally friendly and biodegradable products. Those new products will have endless possibilities to impress your customers. A surprising message has to be given. Our team of product developers and designers have developed some great products and concepts. They are proud and happy to share these new ideas with you.

Seed paper - endless possibilities and product opportunities

Corthogreen B.V. is a leading European manufacturer of seed paper. Together with our customers and distributors, we are developing every year new products: calendars, packaging wraps, unique sustainable mailings, envelopes and much more.

All with the same purpose, to make the different industries more sustainable with seed paper products. With new printing methods, Corthogreen can even create more amazing branded products.

Challenge us and let's grow together!

For more information check page 8.

„Green and simple everybody can do this“

Easy Gardening

More and more people are becoming aware of sustainability and have an environmentally friendly way of thinking. People like to grow their flowers, herbs and vegetables. On the other side, people also want to grow their products easily. Corthogreen wants to make it easy for people to sow their flowers, herbs and vegetables. For example with our new seedsticks. Put the stick in the garden or pot and the seeds will grow. We also have the total biodegradable sowing pot. When you use this pot for sowing some seeds, you can put the whole pot in the ground when the plant is getting too big. Our seed paper is also easy to use. Put it in the ground, give it a bit of water and see the flowers growing.

We love nature!

Protecting the nature and planet is very important. That is possible with our seedproducts. When people sow seeds for flowers and herbs, bees and butterflies will come to eat from the flowers. We created a lot of products with good seeds for the bees. For example a simple seedbag with bee-friendly seeds is a great ecological business gift, to show your customer that you take care about our nature.

Check all the products on our website or send us an email.

Seed paper

For a surprising message

„We produce our own seed paper on a daily basis“

We are proud to be one of the leading seed paper manufacturers, with more than 40 years of experience in manufacturing seed paper. Creating the best seed paper product for our customer is the common goal in our company. We are committing our greatest efforts to stay innovative in sizes, seeds, grammages and printing techniques. The whole production of seed paper is in The Netherlands with self-developed seed paper production machines. In combination with different processing machines, we create that unique customized product.

Benefits Corthogreen original seed paper

- Easy to use
- Fully biodegradable – approximately 3 weeks
- High-quality standards
- Dutch production – made in The Netherlands
- More than 40 years experience in manufacturing seed paper

The self-developed seed paper or 'Corthogreen original seed paper' series consists of the following grammages (tissue and silk paper):

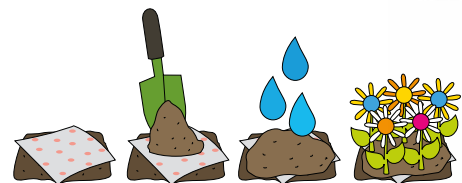

- 40 g/m2
- 50 g/m2
- 80 g/m2
- 200 g/m2

We will keep on developing seed paper sorts with a higher grammage.

„We produce on modern machines in Holland“

Seed packets

Special shapes and different materials

We produce seed packets annually from small to very large orders for customers Worldwide. They are located in the whole-sale, promotion and professional market.

Different materials

The production of our seed packets and small packages meet high quality standards. Materials that we use as a standard are:

- Paper / PE – Full Color printing
- Paper – Full Color printing
- Glassine paper – one Color print
- NEW – tomato fibre material – Full Color printing

Product options

In addition to standard seed bag sizes, we also like to develop together with customer-specific product applications. Some examples are:

- Assortment with seed packets (your private label)
- Seed packets with unique numbering (win codes)
- Standard types of seed packets (delivered quickly)

Own production

From our headquarters in the Netherlands, we produce all our seed packets on modern machines where we can process both small and very large orders. In addition, we can switch quickly in our product capacity to achieve desired delivery times. Furthermore:

- High quality
- Short delivery times
(10 to 15 working days after approval of proof)
- Many varieties quickly available from stock
- Full Color seed packets from 500 pieces (fully personalized)

NEW:
Tomato fibre
material -
full color printed

ORGANIC SEEDS

„Consumers are becoming more aware of what they are buying and also take more care to protect their environment. Since the beginning of 2015 we are SKAL certified. This means that we are allowed to trade organic seeds and process them in our products. For this we are under the control of the following authority: Skal, Bio control.“

Skal number: 103975 NL-BIO-01

NAK TUINBOUW

The quality of seeds is important for Cortthogreen, in origin and germination rate. The quality of the seeds is monitored by the NAK Tuinbouw (the Netherlands Inspection Service for Horticulture) and Cortthogreen is officially registered at this organisation. In this way, the quality of the seeds can be guaranteed for the customers.

BIODEGRADABLE PRODUCTS

„Corthogreen thinks it is important that their products are as biodegradable as possible. Our seedpaper and seed ribbons are 100% biodegradable. This is also an important aspect when developing new products. We want to reduce the use of plastic so we use as many recyclable packaging materials as possible. All products can be found in the product category ,zero waste products.“

Check all the products on our website or send us an email.
